I'm not sure. Mark's message said that they would be posting the doc's on line this week. I assume we could reference the drawings that way, although getting a full screen view would be hard. We can await on-line access or request hard copy drawings as we did previously. Or both.

Hi All -

I just cc'd Alex (DOE) and Gina (WDFW) with the basis of design.

We need to get a copy to NOAA and USFWS as well...I can do that.

Kim - Please what are our instructions ref. drawing sets - how to access?

At long last, here is the Port's final Basis of Design for Upper Clear Creek. With this in hand, it seems time to get the tribal consultation letter out. I've attached the draft here again. Mary Anne or Chan, please do what you can (if it hasn't happened already) to get the letter into the channels for signature as soon as possible. We don't want the tribal consultation component to hold up OECA approval. It would also be good to email Russ Ladley and Bill Sullivan a courtesy copy. With their support of the agreement, hopefully they can help facilitate a timely and effective consultation. Thanks, - Kim

Kim and Kent,

Attached is the Final Basis of Design (BOD) Report for the Upper Clear Creek Mitigation Site (UCCMS). This version incorporates the agreements from our last meeting and the latest emails concerning this BOD.

I hope to upload the Final Basis of Design (BOD) Plans (drawings) to the ftp site by Friday. I'll let you know when I've uploaded the plans and I'll provide you with the instructions to access the site at that time.

Please confirm receipt of this email with the attached BOD Report.

Thanks,

Mark
